A320neo full guide from cold and dark, MCDU set-up, takeoff, approach, landing. As a relative beginner in flight simulators and especially big jets, I really wanted to properly learn how to operate the Airbus. There are already great tutorials about all stages of a flight available on YouTube, and I decided to create my own checklist document from these videos because there is no way I can remember every detail of that during a flight.

Each FMGC is linked to its own onside MCDU, RMP, and EFIS control panel. After entry of the flight plan and other required performance data into the MCDU, the FMGS generates the climb and descent profiles for departure and arrival, provides automatic airplane guidance, and computes current and predicted progress along the flight plan.
