### Activity Rule Of 72 With Answers - modapktown.com

Remember, the Rule of 72 is an approximation, but it's a remarkably accurate one we can use with confidence for our Rule #1 calculations. The exact number of years it takes to double once at a 24% growth rate is 3.2 years, which is to say that the Rule of 72 is very accurate around 10% but gets less accurate the farther from 10% we go.

### Rule of 72: All You Need To Know | Rule #1 Investing

The Rule of 72 works as follows. If we want to know how long it will take for our money to double, just divide "72" by the interest rate. So for example, if the interest rate is "10%", 72 ÷ 10 = 7.2 years. So it will take just over "7" years to double our money. If the interest rate is "8%", to double our money it will take. 72 ÷ 8 = 9 years

### Rule of 72 - Intmath.com

List the name of the fund / interest or 72 bank that yourate found in the second column, and the rate of return = years doubleFinally, investment in the thirtocolumn. use the Rule of 72 (right) to determine how long it will take your money to double using that particular type 72 / the years it takes to double of investment, and write it in the fourth column.
