Baconian method, methodical observation of facts as a means of studying and interpreting natural phenomena. This essentially empirical method was formulated early in the 17th century by Francis Bacon, an English philosopher, as a scientific substitute for the prevailing systems of thought, which.

Baconian method | science and philosophy | Britannica

The Baconian method is the investigative method developed by Sir Francis Bacon, one of the founders of modern science, and thus a first formulation of a modern scientific method. The method was put forward in Bacon's book Novum Organum, or 'New Method', and was supposed to replace the methods put forward in Aristotle's Organon. This method was influential upon the development of the scientific method in modern science; but also more generally in the early modern rejection of medieval Aristotelia

Baconian method - Wikipedia

To Bacon, this was an unstable artifice on which to build our understanding of the world. Better that we start reasoning from first principles, building up our knowledge of the world through inductive reasoning. E.Ö. Wilson summarizes Bacon's contribution in a chapter on the Enlightenment in his excellent book Consilience.
