...

The N52 engine is no longer used in BMW vehicles because of a few glitches that drivers began to notice, including the infamous lifter ticking noise. This ticking noise commonly occurs while the car is in-transit in particularly colder temperatures or after a series of stop-and-go trips around town.

## **How to Avoid the Lifter Ticking Noise in Your BMW ...**

n52 engine ticking, serious problem, or not? Hi my n52 in my 128i ticks from time to time. from research i have gathered that this could be the lifters not oiling the engine properly etc... one person on the 5 series forums said BMW spent \$12k replacing basically his entire upper half of his n52 engine... lucky he caught the issue pre warranty expiration... !?!!

## **n52 engine ticking, serious problem, or not?**

The ticking noise is caused by the hydraulic valve adjusters, also known as lifters, not getting enough oil to function properly. The lifter ticking noise isn't detrimental to performance or harmful to the engine, but rather it is extremely annoying and more of a nuisance.

...

The most common cause of VANOS noise involves excessive wear between the cam gear and VANOS shaft. Excessive axial play can also develop over time, leading to camshaft lash and the telltale VANOS rattle. ... VANOS is an amazing feature that gives your BMW engine better performance and efficiency, so it only makes sense to keep it in great shape ...

## **Dealing With VANOS Rattling in BMW Engines**

HVAs....typical N52 ailment, but some seem to suffer A LOT worse than others, I have it too although it's a very light ticking. The so-called redesign hasn't really helped according to overseas forums, and the BMW bleed procedure to get the air bubbles out of the oil in the upper parts of the engine is simply a band aid as the symptoms usually return.

## **question: 2006 BMW E90 with ticking noise on engine**

This noise can be caused by insufficient oil pressure to lubricate the lifters. BMW's procedure for noisy lifters on the N52 is to first bleed the lifters by holding the engine at higher revs for up to 30 minutes.

## **Ticking noise E70 - N52 - Bimmerfest - BMW Forums**

In the N52 engine, there technically are no lifters, the part at the root of the issue is the hydraulic valve adjuster, or HVA. A lifter goes between the camshaft and the valve, and simply rides against the cam, pushing open the valve as the cam turns.
