In this concept map, the chemical communication which is apart of the endocrine system, has that is and isn't in the ducts of the hormones. These hormones travel through the glands until they reach the target cell and attach to a receptor. This is a feedback loop about target blood level and what happens when it is too high or too low.

**Unit 2 - Weebly**

Identity. Unit one engages students in a discussion of what it means to be human. Students investigate the body systems and functions that all humans have in common, and then look at differences in tissues, such as bone and muscle, and in molecules, such as DNA, to pinpoint unique identity.
