Mondiale "Celtic" Lathes
Celtic 14 lathe headstock internals with the slow-speed "backgear" engaged - the dog-clutch has been slid forwards into engagement with the Bull Wheel. The re-positioned drive system shows that the "14" was not just a "12" with an increased centre height but a completely re-engineered lathe that shared with it only a few minor parts.

Dougall Model DT-50 lathe. Since I don't have a manual and that I can't find one on the internet, I started googling for information. That's how I found out about this forum. I've use a Celtic 14 in the past to turn lot's of different tools and such, but I'm having difficulties with this particular lathe when it comes to threading.

Don't know how to thread on this lathe - The Home Machinist!
