Chapter 39- Endocrine & Reproductive Systems

CH 39: Male reproductive and Disorders : The average volume of semen ejaculated is 2.5 to 4 mL but may vary from 1 to 10 mL. The hypothalamus, the anterior pituitary, and the testes secrete hormones that control male reproduction. •The hypothalamus secretes gonadotropin-releasing hormone (GnRH) in response to an unknown stimulus. GnRH stimulates the anterior pituitary to release luteinizing ...

CH 39.docx - CH 39 Male reproductive and Disorders The ...

The female reproductive system functions to produce gametes and reproductive hormones, just like the male reproductive system; however, it also has the additional task of supporting the developing fetus and delivering it to the outside world. Unlike its male counterpart, the female reproductive system is located primarily inside the pelvic cavity.
