Consumer Math

Consumer Math We have to work with money every day. While balancing your checkbook or calculating your monthly expenditures on espresso requires only arithmetic, when we start saving, planning for retirement, or need a loan, we need more mathematics.

Consumer Math | Mathematics for the Liberal Arts

Consumer Mathematics. This course explains how four basic mathematical operations – addition, subtraction, multiplication, and division – can be used to solve real-life problems. It addresses practical applications for math, such as wages, taxes, money management, and interest and credit. Projects for the Real World activities are included that promote cross-curricular learning and higher-order thinking and problem-solving skills.

Consumer Mathematics | Edmentum

Bridge the gap between just learning mathematical procedures and using them in everyday situations with the practical exercises of Consumer Mathematics. This textbook covers concepts such as buying, insuring, and maintaining a car; social security tax; creating and balancing a budget; renting a home; buying food and clothing; tax forms; and affording leisure time.
