As the class is completing the table I hand out the decay series practice worksheet. The remainder of the period is used to practice writing nuclear decay equations and reinforce the associated concepts presented during the Powerpoint. All of the questions on the worksheet (decay series key), (student work) can be answered using the notes. The first portion of the assignment has students answer 10 questions about alpha, beta and gamma radiation and their penetrating ability.

The 9 questions have students write a nuclear equations, predict daughter products (defined in Q. 2), practice alpha decay with several isotopes and summarize the mass of daughter products after alpha decay (Nuclear Decay_Key). The goal is to realize that alpha decay will reduce the mass of isotope by 4 and atomic number by 2.

Have students examine each decay chain, identify the elements (or isotopes) within each decay chain, and determine whether each transformation is due to the emission of an alpha or beta particle. The Decay Chain: Teacher Answer Key provides questions and answers to review with students. Have students share (orally or in writing): What they have learned from the activity. How we might use and benefit from radioactive elements that decay.
