global warming, ozone depletion, air and water pollution, deforestation, depletion of top soil, waste disposal and loss of biodiversity. The goal of the introduction is to dispel a notion that environmental problems are not serious and those problems require little to no action to try and resolve these problems.

Overview - Earth In Balance- Al Gore

The Gaia hypothesis is a controversial theory which suggests that living beings interact with Earth to form a complex system which self-regulates to maintain the balance of nature. [4] [5] The theory that nature is permanently in balance has been largely discredited by scientists working in ecology , as it has been found that chaotic changes in population levels are common.
