Webquest and Using P.E.O.E. to Elicit Student Ideas About EM Spectrum and Heat Transfer 45 minutes Students access the three websites listed on this handout to help them gather information about electromagnetic energy.

Electromagnetic Spectrum Webquest - BetterLesson

What is Electromagnetic energy? Electromagnetic energy travels in waves and spans a broad spectrum from very long radio waves to very short gamma rays. The human eye can only detect only a small portion of this spectrum called visible light. A radio detects a different portion of the spectrum, and an x-ray machine uses yet another portion.

Introduction to the Electromagnetic Spectrum | Science ...

Oftentimes in astronomy, researchers must use equipment that measures other types of radiation, like radio waves, x-rays, or ultraviolet (UV) rays. All of these types of radiation are a part of the electromagnetic spectrum. The entire electromagnetic spectrum is pictured below. It is also in your textbook on page 71.

Part 1: Electromagnetic Spectrum - Spectroscopy WebQuest

There are three main tasks in this webquest. First...you will explore several websites and begin collecting information about the specific types of electromagnetic waves. You will discover that electromagnetic waves come in different wavelengths, have different sources and can impact humans in a variety of ways.

WebQuest: The Electromagnetic Spectrum

The Electromagnetic Spectrum The electromagnetic (EM) spectrum is the range of all types of EM radiation . Radiation is energy that travels and spreads out as it goes - the visible light that comes
