Elements Algebraic Topology James R

Algebraic topology is a tough subject to teach, and this book does a very good job. Some prerequisites, however, are essential: * point set topology (e.g. in Munkres' Topology) * Abstract algebra * Mathematical maturity to be willing to follow a definition and argument even when it seems like a weird side-track

set topological nature that arise in algebraic topology. Since this is a textbook on algebraic topology, details involving point-set topology are often treated lightly or skipped entirely in the body of the text. Not included in this book is the important but somewhat more sophisticated topic of spectral sequences.
