### **The CJ610 Engine | GE Aviation**

The CJ610, derived from General Electric's J85 military turbojet engine, powered the majority of the first generation of business jet aircraft during the 1960s and early 1970s. Taking a different course than usual, and to better match its size to then new executive aircraft, this engine resulted from removal of the fan from the larger CF700 turbofan engine.
