[PDF] A Guide To Colour Mutations And Genetics In Parrots ...

The science of cockatiel colour genetics deals with the heredity of colour variation in the feathers of cockatiels, *Nymphicus hollandicus*. Colour mutations are a natural but very rare phenomenon that occur in either captivity or the wild. About fifteen primary colour mutations have been established in the species which enable the production of many different combinations. Note that this article is heavily based on the captive or companion cockatiel rather than the wild cockatiel species. Cockati
