P1356 = no combustion, rear cylinder. Usually means the "ionic / combustion" signal voltage was low ... often it's a plug that needs regapped or replaced, or wrong plug (swap the front plug with the rear and see if the DTC code changes to P1353; or install a new factory plug). also can be caused by a loose or bad plug wire (make sure the plug wire is firmly attached to the plug, and at the coil).
