The Honda CB600F Hornet was introduced for Europe in 1998. It was based on the CB250F that was restricted to 250 cc (15 cu in) at its home-market (Japan) because of local laws (this bike was released only in Japan from 1996 or 1997 until 2015, when it was succeeded by the CB300F). The bike has a six-speed transmission.

The Hornet has been around for a few years now, the inaugural model featuring a 16-inch front wheel and using the previous-gen CBR600F motor. For 2007, Honda has launched a brand new CB600F Hornet with the latest CBR600RR engine. Never mind the engine, though; it's the chassis and handling that really impress.
