LabVIEW 2020 simplifies the design of distributed test, measurement, and control systems decreasing your time to market. Combine LabVIEW 2020 with proven, off-the-shelf customizable hardware from NI which has been used by engineers for over 30 years to develop and deploy custom large-scale industrial and production systems.

LabVIEW 2020 - NI

LabVIEW is a development environment for creating graphical programs called virtual instruments (VI), that simulate actual laboratory instruments. A VI consists of two parts: a front panel and a back panel. The front panel allows the user to interact with the VI by displaying output and allowing the user to supply the program with input.

Labview Digital Logic Lab - EG1003 Lab Manual

Labview Page 2-----From this point forward is the traditional lab #1 Analog Electronics-----In modern analytical chemistry, the quantity to be measured, for instance, the intensity of a light passing through a solution, is converted into an electrical signal which is then amplified or modified to operate a device which can visually display the numerical value of the measured quantity.

Lab 1: Lab View (Analog Electronics) - Chemistry LibreTexts

LabVIEW LabVIEW is a graphical programming language that uses icons instead of lines of text to create applications. In contrast to text-based programming languages, where instructions determine program execution, LabVIEW uses dataflow programming, where the flow of data
