Nikon Creative Lighting System Practical Guide

Looking past the marketing jargon, Nikon CLS is a set of technologies (and automations) that enable photographers taking the most out of their flash systems with the minimum effort. The technologies making up CLS include: i-TTL balanced fill flash. Auto FP High Speed Sync.

The Grey Blog: Nikon Creative Lighting System Tutorial ...

Nikon's CLS works differently from Pocket Wizard style systems. In the case of Pocket Wizards, the technology is based around wireless radio signals much like a garage door opener or cordless phone. CLS, on the other hand, relies on preflashes to properly determine the right amount of power to use, as well as to trigger other flashes.

Understanding the Nikon Creative Lighting System

The pre-flash is still required for digital, but it takes place slightly earlier in the exposure cycle, before the mirror flips up. Therefore, pre-flash exposure is measured inside the viewfinder instead of inside the mirror box. In addition to TTL flash, CLS is a complex system of master and remote wireless flashes.
