As a solutions architect you tend to look at how to apply the right (or newest, or coolest) technology to a problem. But as an Enterprise Architect you often have to apply the right technology to your team.

Four Key Differences Between a Solution Architect and an ...

Enterprise and solution architects may both stimulate and contribute to business planning. But their primary responsibility is business system planning. Business systems are composed of human (people) and computer (technology) actors performing activities to meet aims (goals).

The business planning context - Enterprise and Solution ...

There is something that I call "the orthodoxy" (or Good Old-Fashioned Enterprise Architecture—GOFEA; see GOFAI), which says that enterprise architecture is about high level strategic issues, whereas—say—solution architects are more about details and technology. Implicitly, this says "enterprise architecture is about high level and strategy only."

Technical vs. solution vs. enterprise architecture: a ...

Enterprise Architect Vs. Solutions Architect Role. An enterprise architect is responsible for overseeing a company's entire enterprise ecosystem. Enterprise architects focus on constructing and managing complex solutions that solve the company's critical strategic issues.

What is a Solutions Architect's Role: Complete Guide

You have different answers depending on which strategy drives the architecture. Very very short answer is that the difference between enterprise architect and any other architect specialization, is the scope of responsibility. Other than that, the solution architect usually have technology and system understanding and responsibility.
