It's fascinating to read in "Soul Made Flesh" how completely the mind of the Middle Ages was infused with mysticism. People who were otherwise brilliant found it impossible to believe that any aspect of nature could operate in a purely mechanistic fashion, without spirit or purpose. In fact it was considered blasphemous to think otherwise.

Thomas Willis was a foremost figure in the intellectual revolution of the 17th century. He is considered to have founded the scientific study of the brain, neurology -- to have discovered the brain, as the subtitle has it. A biography of him is to be welcomed, but I felt let down by Soul Made Flesh.
