Turn the screw with the screwdriver while monitoring the front of the barometer. The screw will move the large hand, and you want it to point at the current pressure. Locate the knob in the center of the barometer on the front of the instrument. Set the small hand using the knob, so it is directly over the big hand.

Then turn your barometer over and adjust the adjustment screw so that the needle on the barometer points to the number you derived as the average of the two airport settings. Say the two numbers you wrote down are "2 9 7 4" and "2 9 8 2"---the average is 2978 so you would adjust your barometer so the needle points to 29.78.

and is based in Wood Ridge, New Jersey. As of January 13, 2010, Springfield Precision Instruments, Inc. operates as a subsidiary of Taylor Precision Products, Inc.

Springfield Instruments, Springfield Instruments ...

I have a Springfield Barometer I inherited from my father. It appears to be stuck at 31.01 in.hg., and I know that the current barometric pressure is much lower. When I set the fixed needle (on the front) to the current reading... the barometer never seems to change. So what can I do - short of chucking in the round file? Is there anything I can do to make this thing read correctly?

How do you adjust and tune-up a Springfield Barometer ...

The Springfield Instrument Company was founded in 1956 by two New York City dentists. They supplied weather instruments for the home market and were located in Hackensack, New Jersey. In 2009 Taylor Precision Products acquired Springfield. They still supply thermometers and still use the Springfield name but they have gone digital.
