...

This lab activity requires students to identify symbiotic relationships. Lab groups receive a set of symbiotic cards (included in the document). On the card is the name of an organism and some clues about a symbiotic relationship it has with another organism. The lab groups task is to match up the

Symbiotic Relationships Lab Worksheets & Teaching ...

A symbiosis is an evolved interaction or close living relationship between organisms from different species, usually with benefits to one or both of the individuals involved. Symbioses may be 'obligate', in which case the relationship between the two species is so interdependent, that each of the organisms is unable to survive without the other, or 'facultative', in which the two species engage in a symbiotic partnership through choice, and can survive individually.

Symbiosis - Definition, Types and Examples | Biology ...

This student-centered station lab is set up so students can begin to explore symbiosis. Four of the stations are considered input stations where students are learning new information about symbiosis and four of the stations are output stations where students will be demonstrating their mastery of the input stations.
