Textile And Clothing Value Chain

The Apparel chain usually starts with large retailers with established brands and distribution channels in the importing countries coming up with designs of clothing they would like to sell in the upcoming season, and then outsourcing the manufacturing portion of the chain to developing countries to keep the cost of production low.

Global Value Chain | The Apparel Industry

The challenges in the textiles, apparel and footwear industries are manifold and are increasing in complexity and speed. Companies that want to operate successfully and sustainably must do more than just generate solid financial results. The value chain of the textiles, apparel and footwear industry is still heavily influenced by environmental pollution and low social standards, especially in the preliminary stages of production.

Textiles, Apparel and Footwear - shared.value.chain

The textile and clothing industry presents a lot of potential for value-added benefits and job creation. It is estimated that up to 600% of value can be created along the cotton value chain: from cotton production, spinning and twisting into yarn, to weaving and knitting into fabric, followed by dyeing, printing and designing.

Textile and Garment - WACOMP

Environmental and social impacts associated with the textile value chain are significant and therefore of increasing concern to the global community. In the current, mostly linear, system for producing, distributing, and using clothing more than \$500 billion in value is lost from the system every year due to under-utilized clothes and the lack of recycling.
