Project Gutenberg is a wonderful source of free ebooks - particularly for academic work. However, it uses US copyright law, which isn't universal; some books listed as public domain might still be in copyright in other countries. RightsDirect explains the situation in more detail.

The Island Of Colorblind Oliver

Island of the Colorblind. This book is part of a new 6-book cover-collage design. Oliver Sacks has always been fascinated by islands--their remoteness, their mystery, above all the unique forms of life they harbor. For him, islands conjure up equally the romance of Melville and Stevenson, the adventure of Magellan and Cook, and the scientific wonder of Darwin and Wallace.

The Island of the Colorblind | Oliver Sacks, M.D. | Author ...

The Island of the Colorblind is filled with history and science concerning the superficially unrelated topics of neurology and botany. The first part of this book focuses largely on inherited blindness among a tiny Pacific population, and the second part examines a strange illness afflicting the older residents of Guam that in some patients looks like ALS and in others looks like parkinsonism.

The Island of the Colorblind: 9780375700736: Medicine ...

About The Island of the Colorblind "An explorer of that most wondrous of islands, the human brain," writes D.M. Thomas in The New York Times Book Review, "Oliver Sacks also loves the oceanic kind of islands." Both kinds figure movingly in this book--part travelogue, part autobiography, part medical mystery story--in which Sacks's journeys to a tiny Pacific atoll and the island of Guam become explorations of the meaning of islands, the genesis of disease, the wonders of botany ...

The Island of the Colorblind by Oliver Sacks ...

This is an absolutely fascinating book by Oliver Sacks. Really cool dude. See, he goes on this trip to the Pacific and there is an island there where a huge chunk of the population is Achromatropic (pure colorblindness as in grayscale) and he sets out to that island with an achromatropic friend.

The Island of the Colorblind by Oliver Sacks

Summary In Book I Oliver Sacks describes his visit to Pingelap and Pohnpei in the Caroline Islands (now a part of the Federated States of Micronesia). On Pingelap (population 700) 5-10% of the people are completely colorblind; i.e. they have a rare hereditary condition called achromatopsia in which the retina has no functional cone cells.

The Island of the Colorblind - New York University

The Island of the Colorblind is a 1997 book by neurologist Oliver Sacks about achromatopsia on the Micronesian atoll of Pingelap. It was published in the UK as The Island of the Colour-blind. The second half of the book is devoted to the mystery of Lytico-Bodig disease in Guam. External links. The Island of the Colorblind

The Island of the Colorblind - Wikipedia

Recently, by chance, he discovered an island in the Pacific with almost ten percent of its population colorblind, and he became very interested in visiting this unique geographic isolate of achromatopsia. The island was Pingelap and its unique history created its high percentage of colorblindness.
