Path lighting allows you to walk at night safely in conditions of low or no natural light. Rather than flooding the whole space with a blanket of light, you can provide localized pools of low light on the ground, right where you need it. Aside from being more visually interesting, it ultimately saves energy to boot.

The Path to Great Path Lighting - Lightology

The path of light through the eye begins with the objects viewed and how they produce, reflect or alter light in various ways. When your eyes receive light, it begins a second journey through the eye's optical parts that adjust and focus light to the nerves that carry images to your brain.
